

# TYRANNOSAURUS REX

---

Created for NFS4 by The Power City Tuning Team and converted to NFS3 by Opus IV Gamer | [opusivgamer@gmail.com](mailto:opusivgamer@gmail.com)

This is a Tyrannosaurus Rex, the most ferocious animal that has ever existed on Earth, now brought back to life to run on the tracks of Need for Speed III.

This model is not mine, since it is a conversion from Need for Speed IV: High Stakes of the same addon created by Lawrence (The Power City Tuning Team), so I give credits to him.

This dinosaur has the same performance as the Mercedes CLK-GTR from NFS3 and a weight of 100 tons, so that it can fly off any vehicle it finds in front of its passage, including police cars. This model is available in the class A and in all supported languages. To install it put "trex" folder that you find in the downloaded Zip file into "C:/Program Files/Electronic Arts/Nfs3/Nfs3/Gamedata/Carmodel".

A slide is also available named "08\_00.qfs", that will appear on the screen before every race, to insert in the path "C:/Program Files/Electronic Arts/Nfs3/Nfs3/Fedata/Art/Slides".

You are allowed to convert this addon to another Need for Speed version or to another game or using it as a basis for your projects only with the permission of the original author of this model (Lawrence from The Power City Tuning Team) by contacting him at his e-mail address: "wlaw@inwind.it"
