

BEDFORD CF VAN

Created by The Power City Tuning Team for NFS4 and converted by Opus IV Gamer to NFS3

opusivgamer@gmail.com

This is a Bedford CF Van, a full-sized panel van built by Bedford, a brand manufactured by Vauxhall Motors, between 1969 and 1988, now available for Need for Speed III.

This model is not mine, since it is a conversion from Need for Speed IV: High Stakes of the same car created by The Power City Tuning Team, so I give credits to them.

This car is available in three different upgrades in addition to the base model, the latter has realistic performance, steering and rolling while upgrades perform better than the base model. All models are available to AI opponents drivers in the class C and in all supported languages. To install them put the following folders: "bed0", "bed1", "bed2", "bed3", that you find in the downloaded Zip file into "C:/Program Files/Electronic Arts/Nfs3/Nfs3/Gamedata/Carmodel"; the various folders correspond to the various upgrades of this van.

Some slides are also available named "42_00.qfs", "43_00.qfs", "44_00.qfs", "45_00.qfs", that will appear on the screen before every race, to insert in the path "C:/Program Files/Electronic Arts/Nfs3/Nfs3/Fedata/Art/Slides". Image credits: By Jeremy from Sydney, Australia - Bedford CF, CC BY 2.0, <https://commons.wikimedia.org/w/index.php?curid=37778818>

You are allowed to convert this car to another Need for Speed version or to another game or using it as a basis for your projects only with the permission of the original author of this model (Lawrence from The Power City Tuning Team) by contacting him at this email address: "wlaw@inwind.it".
